Asia Pacific
COVID-19 Rapid Perception Survey

Suggested Text for participants:
The Red Cross and ________________ want to understand what you already know and still want to
know about COVID-19.

This survey will take about 20 minutes, and includes questions about health and communication. Your
answers will help us improve the way we respond to COVID-19.

Thank you for taking part.

For online survey: Start the survey when you have time to complete it with no interruptions. Please
close other programmes (e.g. chat or email) to avoid distractions.

Further information:
1. This survey is anonymous so we will not ask you for your name or address. We will combine all
the answers we receive, from you and from many other participants, and we will store those
answers securely. We, or our partner organisations, might use the answers in the future, but no
one will ever be able to identify your specific answers.
2. You can stop answering questions at any time without giving a reason.

How you can contact us

Responsible:

XXX

Do you agree to answer a few questions?

Yes
No (stop survey)

Guidance: Include the questions below in all assessments.
The Annex lists more questions that you can include, depending on context and secondary data. See
accompanying guidance note ‘How to conduct assessments remotely.’

| 6. | Have you heard of COVID-19? (Choose one answer) | Yes  
No  
Don’t know |
COVID-19 is a disease caused by a new strain of coronavirus. ‘CO’ stands for corona, ‘VI’ for virus, and ‘D’ for disease. Formerly, this disease was referred to as ‘2019 novel coronavirus’ or ‘2019-nCoV.’ The COVID-19 virus is a new virus linked to the same family of viruses as Severe Acute Respiratory Syndrome (SARS) and some types of common cold. There is an outbreak of respiratory disease caused by the novel coronavirus. This virus was first discovered in China in 2019 and since then spread across the world. There are thousands of confirmed cases and many deaths related to the novel coronavirus, including in [add country]. Sources: WHO, UNICEF, IFRC

| 7. | How dangerous is COVID-19? (Choose one) | Very dangerous  
A little dangerous  
Not dangerous  
Don’t know |
| 8. | How is COVID-19 spread? (Choose one or more answers) | Blood transfusion  
Droplets from infected people  
In the air  
Direct contact with infected people  
Direct contact with infected animals  
Touching contaminated objects or surfaces  
Mosquito bites  
Eating contaminated food  
Drinking unclean water  
Don't know |
| 9. | How do you and your family protect yourselves from COVID-19? (Choose one or more options) | Wash hands regularly using hand sanitizer with 70% alcohol or soap and water for 20 seconds.  
Cover mouth and nose when coughing or sneezing |
**Include filter to display after this question.**

Things can you do to keep yourself and your family safe from Covid-19.

a.  **Wash your hands frequently**  
Regularly and thoroughly clean your hands with an alcohol-based hand rub or wash them with soap and water.  
Why? Washing your hands with soap and water or using alcohol-based hand rub kills viruses that may be on your hands.

b.  **Maintain social distancing**  
Maintain at least 1 metre (3 feet) distance between yourself and anyone who is coughing or sneezing.  
Why? When someone coughs or sneezes they spray small liquid droplets from their nose or mouth which may contain virus. If you are too close, you can breathe in the droplets, including the COVID-19 virus if the person coughing has the disease.

c.  **Avoid touching eyes, nose and mouth**  
Why? Hands touch many surfaces and can pick up viruses. Once contaminated, hands can transfer the virus to your eyes, nose or mouth. From there, the virus can enter your body and can make you sick.

d.  **Practice respiratory hygiene**  
Make sure you, and the people around you, follow good respiratory hygiene. This means covering your mouth and nose with your bent elbow or tissue when you cough or sneeze. Then dispose of the used tissue immediately.  
Why? Droplets spread virus. By following good respiratory hygiene you protect the people around you from viruses such as cold, flu and COVID-19.

Avoid close contact with anyone who has a fever and cough
Avoid touching your eyes, nose, and mouth
Cook meat and eggs well
Avoid unprotected direct contact with live animals and surfaces in contact with animals
Stay indoors
Follow the recommendations of authorities in my country to prevent the spread of COVID-19
Use traditional herbal remedies
Using a mask
Don't know
Other
e. If you have fever, cough and difficulty breathing, seek medical care early

Stay home if you feel unwell. If you have a fever, cough and difficulty breathing, seek medical attention and call in advance. Follow the directions of your local health authority.

Why? National and local authorities will have the most up to date information on the situation in your area. Calling in advance will allow your health care provider to quickly direct you to the right health facility. This will also protect you and help prevent spread of viruses and other infections.

f. Stay informed and follow advice given by your healthcare provider

Stay informed on the latest developments about COVID-19. Follow advice given by your healthcare provider, your national and local public health authority or your employer on how to protect yourself and others from COVID-19.

Why? National and local authorities will have the most up to date information on whether COVID-19 is spreading in your area. They are best placed to advise on what people in your area should be doing to protect themselves.

Sources: WHO, UNICEF, IFRC

10. Crises often involve fears and worries. Please let us know at the moment, what three things are you most worried about related to COVID-19?

For each data point, please use the scales (never worry; rarely worry; frequently worry).

- losing someone I love
- health system being overloaded
- schools closing
- small companies closing down
- recession
- restricted access to food supplies
- civil unrest
- getting sick
<p>| | | |</p>
<table>

| 10. |   | losing my job  
| Other: _____ |
| 11. | Do you think a specific group is responsible for spreading COVID-19 to your community? | Yes  
| | | A little  
| | | No |
| 12. | (If a little or yes, survey should ask)  
| Which group do you think is responsible for spreading COVID-19? | Open question |
| **Trust in Sources / Channels of information** |   |   |
| 13. | What kind of information have you received about COVID-19? (Choose one or more options) | How to protect yourself from COVID-19  
| | | The symptoms of COVID-19  
| | | How COVID-19 is spread  
| | | What to do if you have the symptoms of COVID-19  
| | | Risks and complications COVID-19  
| | | Other: ____________________ |
| 14. | How often do you use the following sources of information to stay informed about COVID-19?  
| For each data point please use the scales never; rarely; sometimes; very often; always. | Television  
| | Printed newspapers  
| | Conversations with family and friends  
| | Websites or online news pages  
| | Social media (e.g. Facebook, Twitter, YouTube, WhatsApp, Line)  
| | Search engines (e.g. Google)  
| | Radio stations  
| | Community health workers  
| | Community or religious leaders  
| | Traditional healers  
| | Traditional midwives |
### 15. How much do you trust the following sources of information in their reporting about the COVID-19?

For each data point please use the scales very little trust; a moderate amount of trust; a great deal of trust.
